Signature Form & Legibility Guide

Company Name: _____

Customer Acct #: _____

Contact Name: _____

PO #: _____

Phone #: _____

Order Date: _____

NOTE: This form is a supplement to your actual order form. Please be sure to submit with your order form

Signature Stamps require a clear, crisp sample to create a good impression.

Use a black gel or ball point pen.

The best reproductions come from samples using solid black ink on white paper. This allows our scanner to capture the best contrast level possible.

Use consistent pressure.

Connecting lines, crossbars and dots are easily lost in the reproduction process. We will do our best to replicate your signature however extremely fine lines may be lost in the reproduction process.

Provide multiple samples if possible.

Preferrably 3 samples in order to prevent the need to resubmit your form due to smudges, creases or fax machine artifacts that may impact your final product.

If submitting digital sample

Please submit your sample as a 300 DPI JPG. Email samples to wenorder@wendellsinc.com
