# Custom Minting

Die Struck Coins and Medallions capture the essence of celebration, commemoration and a truly timeless memory. Few products have the lasting quality of metal. A finely crafted medallion is the easiest way to ensure your sentiment will be noticed, carried and treasured for a lifetime.

After assisting you in creating the perfect design our artisans will strike your design in Bronze, Copper, Nickel Plating, NiCodium® or Aluminum. We even offer Silver or Gold Plating as well as .999 Fine Silver pieces for your special creation.

Our mint draws great pride from the quality with which we strike each piece of your order. Our time-tested numismatic striking process has been carefully refined, and our customers each have the assurance of our satisfaction guarantee. We fully understand the importance of creating a truly memorable impression and bringing this great importance to your special project.

**Bronze** is our most popular base material for custom die-struck medallions. The gold-toned material beautifully emphasizes the subtle variances in impression for any design and can be greater enhanced with any of our finishing options. Bronze projects quality and prestige in every custom minting project.

## Bright Bronze

14 Gauge Coins		WT/M	100	250	500	1,000	2,500	5,000	10,000	25,000
